

CoreSource Edge

The Cutting Edge of Cost-Containment

No self-funded plan is complete without CoreSource Edge. With this carefully crafted set of risk solutions, self-funded employers enjoy comprehensive cost-control well beyond what other third-party administrators (TPAs) typically can provide. All clients have access to CoreSource Edge at no extra cost.

Individual services in this program can have a profound impact on medical benefit savings, but when banded together, they become a powerful force for you and your employees. CoreSource Edge seals gaps in benefit plans to keep costs in check, which results in pure savings for your bottom line and for all covered members and dependents.

CoreSource Edge is:

- Fraud detection
- PrecisionRx Specialty Solutions
- Out-of-network discounts and fee negotiations
- Recovery
- Hospital bill auditing

Fraud Detection

Through our partnership with The Sentinel Group, CoreSource brings sophisticated technology and experienced fraud-fighting experts to ensure claim dollars are being spent on valid claims, not bogus or padded ones. The Sentinel Group is a recognized leader in fraud detection, and can help catch the most common type of fraud – billing for services not rendered – which software alone can't find. Extensive data mining, analysis and tracking enable The Sentinel Group to not only detect new fraud and abuse schemes, but also uncover past fraudulent claims for a higher return.

PrecisionRx Specialty Solutions

Specialty drugs help treat chronic and complex conditions, such as cancer, hemophilia and arthritis. They account for less than two percent of medical claims, but can cost up to \$300,000 per year.

Plan participants may be spending up to 10 times the average wholesale price for specialty medication, but with PrecisionRx Specialty Solutions a 500-life group could save \$40,000 to 50,000 a year!

Out-of-Network Discounts and Fee Negotiations

CoreSource PPO participants can still save on out-of-network medical care and treatment. All fees are based on a percentage of savings and any claim that meets a specific threshold is analyzed for upcoding, unbundling or overcharges. Our team evaluates claims and contacts the provider to discuss any billing, coding or pricing issues. A signed agreement is secured on each negotiated discount to ensure no balance billing to the member or the plan sponsor.

Recovery

Recovering overpayments and other claims can bring big savings to a self-funded plan. CoreSource screens paid claims for liable third parties and injury trauma potential. Our recovery delivers “zero-dollar outlays” for incremental yields that top most other similar services.

Hospital Bill Auditing

Errors and miscalculations can be common and costly when it comes to handling complex hospital bills. CoreSource identifies and resolves those questionable charges quickly and effectively.

Saving is Easy: Just Sign Up!

Our clients gain access to CoreSource Edge simply by signing up for the powerful solutions. For more information on how CoreSource Edge can effectively meet your cost management goals, and ensure that your money is being spent where it should be, contact your CoreSource Sales Executive or Client Manager for this complimentary program.
